

Uninterruptible Power Supply

FL Series

Lightning Arrester Box

Power lightning arrester box--FL series are adapted for the AC overvoltage protection in grade B, grade C and grade D. The FL series are applied to outdoor communication station (equipment). The lightning overvoltage protection is important technical mead to ensure the security of LOC. Device and people; It is essential technical Process of the LOC and equipment operation; And is the key components Of network construction and management.

Specification

MODEL	FL-B+C	FL-C	FL-C+B
Input voltage	220/380 Vac		220 Vac
Input current	63A (Max)		30A (Max)
Dimension (WxLxH)	400x170x550 mm		320x125x490 mm
Weight	18 Kg		12 Kg

KTS Series Redundancy

Transfer Switch

KTS Series redundancy transfer switch ensure the high MTBF and the system reliability for multi-power supply. And one or more standby power upon one UPS or another power supply, to supply to the load through redundancy transfer switch. The application on KTS redundancy Transfer switch
